AMENDMENT
Page 3

In the Claims, please delete claim 38. In addition, please amend the claims as indicated on the following pages. Changes to claims are also shown at the end of this document with added text underlined and canceled text in square brackets (i.e., "[]").

37. A mounting structure for at least one display board providing a first mounting interface and a second mounting interface comprising:

c2 a first pivotal interface including a first projection forming a retaining slot adapted to engage the first mounting interface of the display board wherein the first projection is a hook; and

a second pivotal interface adapted to engage the second mounting interface of the display board;

so that the display board is adapted to be removably pivotally coupled to the mounting structure at both the first pivotal interface and the second pivotal interface.

38. Cancelled.

39. A mounting structure for at least one display board providing a first mounting interface and a second mounting interface comprising:

a first pivotal interface including a first projection forming a retaining slot adapted to engage the first mounting interface of the display board; and

c3 a second pivotal interface adapted to engage the second mounting interface of the display board wherein the second pivotal includes a second projection having a post;

so that the display board is adapted to be removably pivotally coupled to the mounting structure at both the first pivotal interface and the second pivotal interface.

40. The mounting structure of claim 37 wherein the second pivotal interface includes a second projection having a post.

41. The mounting structure of claim 37 wherein the second pivotal interface is adapted to be generally coaxial with the second mounting interface.

42. The mounting structure of claim 39 wherein the retaining slot of the first pivotal interface includes a retaining profile with a terminus for securing the first mounting interface of the display board.

43. The mounting structure of claim 37 wherein the first pivotal interface is configured to at least partially grip the first mounting interface of the display board.

44. The mounting structure of claim 37 further comprising a cap having the first pivotal interface and a base having the second pivotal interface.

C3
cont
45. The mounting structure of claim 44 further comprising a frame coupling the cap to the base.

46. The mounting structure of claim 45 wherein the frame is adapted for mounting to an existing structure.

47. The mounting structure of claim 45 further comprising a cover fitted over the frame.

75. The mounting structure of claim 44 wherein the cap includes a plurality of first pivotal interfaces and the base includes a second pivotal interface for each of the first pivotal interfaces so that the mounting structure is adapted to receive and support a plurality of display boards.

76. The mounting structure of claim 39 further comprising a cap having the first pivotal interface and a base having the second pivotal interface.

77. The mounting structure of claim 76 wherein the cap includes a plurality of first pivotal interfaces and the base includes a second pivotal interface for each of the first pivotal interfaces so that the mounting structure is adapted to receive and support a plurality of display boards.

78. The mounting structure of claim 76 further comprising a frame coupling the cap to the base.

c4 79. The mounting structure of claim 76 wherein the frame is adapted for mounting to an existing structure.

80. The mounting structure of claim 76 further comprising a cover fitted over the frame.

81. The mounting structure of claim 37 wherein the first and second pivotal interfaces are generally coaxial.

82. The mounting structure of claim 39 wherein the first and second pivotal interfaces are generally coaxial.

83. The mounting structure of claim 39 wherein the first pivotal interface is configured to at least partially grip the first mounting interface of the display board.

84. The mounting structure of claim 37 wherein the second pivotal interface is disposed below the first pivotal interface.

85. The mounting structure of claim 39 wherein the second pivotal interface is disposed below the first pivotal interface.
